USAMMA POC: Materiel Acquisition Directorate, 301-619-7403, DSN 343-7403
UNIT PRICE: $5,704.51

System Description: Three independent infusion channels for the delivery of a wide range of fluids from various containers including syringes. Also provides a secondary delivery of intermittent medications, fluid challenges, or loading doses from each channel. Each line can deliver a separate drug, helping to eliminate incompatibility and drug sequencing concerns.

Advantages:
1. Rapid on-line titration w/o interrupting flow.
2. Configurable air-in-line thresholds, rate and volume ranges, occlusion alarm settings and KVO rates.
3. Titration of drugs in either dose or volumetric rate. 4. Streamlined PMCS and calibration processes.

Administrative Set Piggy Back (72213N)

USAMMA POC: Materiel Acquisition Directorate, 301-619-7403, DSN 343-7403
UNIT PRICE: $18,940.00

Operator Familiarization: CD-ROM is available.

System Description: The M Series CCT features a three-channel display for ECG and up to two invasive pressures with ranges covering arterial, pulmonary arterial, central venous or intracranial pressure as well as two temperature channels. Of course, it also provides you all the non-invasive parameter options of the M Series including SpO_2, $EtCO_2$, NIBP, and fully interpretive 12-lead ECG.

- ZOLL XL Battery for longer transport times
- Transport-ready design
- Easy-to-read display
- M Series technology and simplicity
- Full range of parameters for a full range of patients
- Flexible color display
- Quick, easy connections
- Ready to gather and share critical data

UNIT PRICE: $1,855.72

Features: The Power Infuser® is the first portable electronic infusion pump designed explicitly for crystalloid and colloid IV fluid management. Small, durable, and easy to use; it can be used at the scene of an accident, during transport, or in the hospital.

Controlled Delivery Improve adherence to protocols; ensure adequate, but not excessive, hydration Whether restoring intravascular volume during circulatory compromise or rapidly infusing a bolus during hemodynamic assessment, the Power Infuser allows unprecedented control of fluid administration. Adjust flow rates from 0.2 to 6 liters per hour or activate the automated 250cc bolus feature.

Occlusion Detection Don't let a blown IV site or kinked line go unnoticed. With a unique downstream occlusion sensor, the Power Infuser responds to excessive resistance in the fluid path by switching to standby and activating an alarm. Head off complications that could arise from an interruption in flow.

Patient Management Provide life-saving fluid resuscitation when a lack of personnel or room to elevate the bag impedes treatment. Avoid accidental infusion of air with unique membranes built into each crystalloid/colloid pump cartridge. This device is valuable when battlefield injuries occur, during mass casualty events or for critical care transport.

	Part Number NSN	Description	Unit
	0040-0013 6515-01-499-5112	Power Infuser® model M100B-3A. Includes bolus setting and uses standard AAA batteries.	each
	0040-0050 6515-01-466-1488	Crystalloid/colloid pump cartridges for the Power Infuser. Includes 18in pump-to-patient tubing set. Sterile, single-use only.	box of 10
	0040-0040 6515-01-466-1481	AC/DC power adapter for the Power Infuser. Wall-mounted, US-type 120VAC plug.	each
	0040-0070 6515-01-470-9907	IV pole clamp for the Power Infuser. Includes IV bag holder and adjusts for horizontal or vertical mounting.	each

FLOATATION ASSEMBLY RESCUE AND TRANSPORT SYSTEM

This flotation system maintains the Sked in a nearly vertical position in the water. It is self righting and keeps the patient's head completely out of the water, even in rough seas. The side floats and chest pad provide buoyancy sufficient to support two rescuers in the water in addition to the patient, while the lead shot filled ballast keeps the foot end down and the head elevated out of the water. The system is available with CO_2 inflatable side float logs.

The SK-600B Hybrid Inflatable Flotation System

Chest Pad (SK-602) Available in Black for military applications the chest pad attaches to the front of the packaged patient, not allowing the patient to float in a face down position. The chest pad is fully inflatable.

CO_2 Inflatable Float Logs (pair) (SK-605 & SK-606) Each of the float logs has an inflatable bladder covered with durable black nylon. The logs can be inflated instantly with the included CO_2 cartridges, or can be inflated by mouth.

Ballast Weight (SK-601) A durable bag filled with 15 pounds of lead shot which attaches to the bottom of the SKED with hook and loop fasteners. This causes the SKED to self right if it capsizes.

Retaining Strap (SK-209) This strap is used to attach the foam floats and the chest pad together.

UNIT PRICE: $416.00

Inspired by the most rigorous demands of our elite military groups, this medical bag system is durable and flexible, suitable for use by military, paramedics, field medic, smoke jumpers, search and rescue units, and any person with need for a really tough bag. The system is modular with internal components that are removable and transferable. The external bags are available in two styles. The Sked-Pak 1 is a heavy duty backpack to be used with the standard Military Alice frame and designed for use in parachute jumps. It comes complete with an integral single point release mechanism and leg straps necessary for jumping safety. The Sked Pak includes a sewn on single-point release and removable bag straps to meet the technical requirements for use by a parachutist. This design eliminates the need for a traditional "H" harness. When released the pack drops on a lowering line for personnel safety on landing It includes other storage pockets, two canteen pockets, and a removable accessory pack that can be attached on the top or bottom.

Compression straps leg straps and release mechanism is included with each bag. The compression straps prevent loss of equipment should the zipper burst on impact. Coil zippers are used throughout the bag, allowing the sliders to be pulled back over a popped zipper, making it as good as new.. The Sked – Pak 1 includes al the internal components listed below. It does not include a pack frame or canteens. A Camelback can replace the 2 qt canteens.

USAMMA POC: Materiel Acquisition Directorate, 301-619-7403, DSN 343-7403
UNIT PRICE: $187.85

The purpose of a tag line is to prevent dangerous litter spin that occurs when hoisting a litter by helicopter. This kit is designed to prevent spin while preventing other problems normally associated with tag lines, such as tangled rope, deployment difficulties, and storage problems.

The Skedco Helitag Kit contains 250 feet of 7 mm water rescue rope. It has a polpropylene core with a nylon sheath which allows it to float in the water and have good abrasion resistance. Both ends have a figure 8 knot on the end of the rope that is backed up with a double overhand knot for safety.

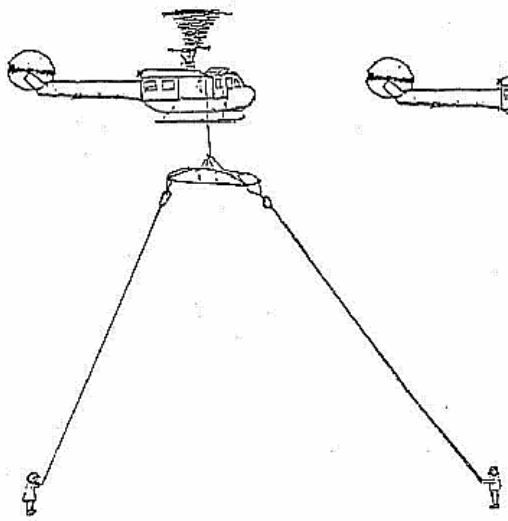
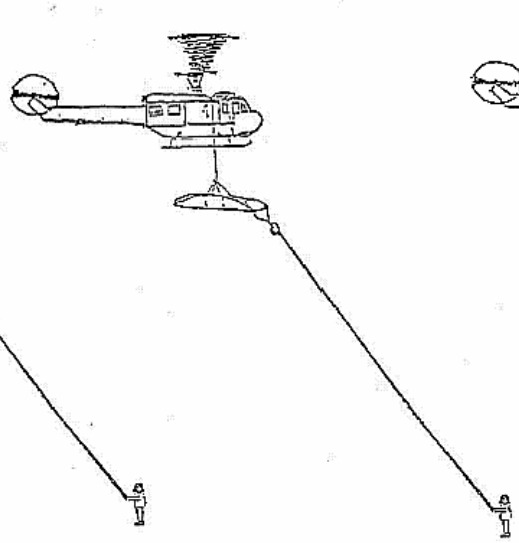
Recommended Personnel Placement for Helicopter Hoisting of a Stretcher

Preferred Placement



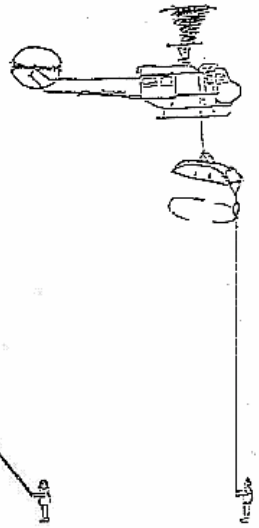
Ideal placement. Use of two tag lines is the safest way to prevent any litter from spinning. Two tag lines should always be used in training and non hostile situations for best litter control. Maximum visibility for pilot and crew.

Good Placement



Good placement to prevent stretcher spin with minimum tension applied to tag line. Maximum visibility for pilot and ground crew.

Improper Placement



While better than no tag line at all, this placement of personnel and equipment tilts the stretcher, increasing the likelihood of spin, and requires greater tension on the tag line to prevent the spin, creating an increased possibility of weak link separation.

WARNING! A NEW WEAK LINK MUST BE USED EACH TIME A HUMAN LOAD IS HOISTED!
