

To whom it may concern:

MedImmune received your request for a Material Safety Data Sheet (MSDS) for:

**CAIV-T™** (Influenza Virus Vaccine Live, Intranasal)

In accordance with 29 CFR 1910.1200, the OSHA Hazard Communication Standard, this product is not deemed to be hazardous. Based on a hazard determination as required by the Standard, **CAIV-T™** does not meet the definition of a hazardous chemical. Therefore, no MSDS is required for this product.

MedImmune, Inc. recognizes that you want to provide as much safety information as possible to your employees regarding the materials they handle and we are happy to assist you in your efforts.

**CAIV-T™** is a live attenuated trivalent vaccine given via nasal administration. There is no toxicity or transmission of influenza expected from incidental occupational exposure to this product. Those administering **CAIV-T™** should utilize universal precautions, including hand washing. Gloving may be appropriate at the health care provider's discretion. Clean up spills of the product with a disinfectant such as 0.05% sodium hypochlorite solution or 3% hydrogen peroxide. The package insert provides additional information regarding the product.

If you have any further questions regarding an MSDS, please call our Environment, Health & Safety Department at (800) 949-3789 or (301) 398-4993.

Sincerely,

Mark S. Tartaglia, MSPH, CIH  
Director,  
Environment, Health & Safety
