

Calibration and Repair of Audiometric Equipment

The Medical Maintenance Operations Division, Tobyhanna Pennsylvania utilizes a mail-in program for calibration and repair of audiometric equipment. Ongoing contingencies have had a significant impact on our turn around time. To receive an approximate timeline for the servicing and return of audiometers please call us at DSN 795-7601 or COM 570-895-7601. In order to reduce our turn around time, we need your help. Please don't wait until after the calibration date expires before sending us your equipment for servicing. Staggering your shipments through the month(s) that calibration is due allows for a much more orderly and productive workflow. This division's goal is to provide the best possible service to our customers.
