

**UNCLASSIFIED**

**INFORMATION PAPER**

**March 30, 2009**

**Occupational Health Survey Set, UA 106A (6545-00-949-4000)**

In order to simplify the acquisition of NSN 6640-01-539-3214, Pouch Soil Collection and NSN 6640-01-539-3238, Water Sampling Insert Pouch, these two items have been removed from UA 106A, Occupational Health Survey Set. Units wishing to procure these items in the future will do so through the USACHPPM Deployment Environmental Surveillance Program (DESP). DESP personnel will procure the nylon pouches, the custom foam inserts, and the sample bottles in bulk, assemble the kits, and ship them to the user as necessary. Units will fill the sample bottles and return the complete kit to DESP for analysis, as needed.

Procuring these items in this manner will reduce the possibility of kits expiring while waiting to be used by a unit, as some of the bottles used to collect samples contain stabilizing chemicals with a limited shelf life.

To obtain complete kits for water and soil sampling, please contact the USACHPPM Deployment Environmental Surveillance Program (DESP) at commercial 410-436-6096 (DSN 312) or send an email to [chppm-desprequests@amedd.army.mil](mailto:chppm-desprequests@amedd.army.mil)

Technical POCs are SME, AMEDDC&S/DCDD, 210-221-1630 and USACHPPM, 410-436-6096.
