

USAMMA FORWARD REPAIR ACTIVITY— MEDICAL (FRA-M)

EVERY SECOND COUNTS...

In field medicine, treating injuries within the platinum minutes, the precious golden hour after they occur, makes a dramatic difference in survival rates. But if medical materiel isn't ready to meet the clinical demands, the healthcare delivery team can't perform to the high standards of care expected by the warfighter and our nation.

USAMMA's FRA-M maintains medical materiel in a state of constant readiness for units conducting military operations, so that when the need arises, medics, clinicians and other healthcare personnel can do their job—saving lives.

**'SERVE TO HEAL...
HONORED TO SERVE!'**
