

\*These equipment sources are used by USAMMA DOC.

## **Gel Packs (Refrigerant):**

Gel Packs – The DOC uses the water soluble gel packs that preserve vaccine temperature safely and efficiently. They are dependable, durable, re-usable and contain nontoxic materials and can be conditioned for either refrigerated or frozen vaccine transportation

### **SIZE WEIGHT DIMENSIONS (in inches)**

Gel Packs – The DOC packing protocol will describe either 24oz or 48oz Gel Packs.

24 OZ - 8 x 6 x 1 ¼”

48 OZ - 10 ¼ x 8 x 1 ½”

The DOC has several DoD approved packing protocols that have been proven to maintain the proper temperature during shipment. Each packing protocol will determine the size and amount of Gel Packs to be used.
